Linkedin: <https://www.linkedin.com/in/murilo-haas-728370118/>

Github: <https://github.com/MuriloRS>

Main Skills: Flutter, Firebase, Javascript, Vuejs, PHP.

CAREER

I'm focus my career on the frontend because is where I most like to work, using great technologies like Flutter for mobile applications, Javascript and Vuejs for web frontend is it possible to have powerfull solutions for web and mobile. I also like to design screens and I have a focus on the user experience, I ask myself is that app easy for all the users use it? If the answer is no the user experience could be enhanced.

EDUCATION

- UNISC, Brazil - Computer Science, 2015 – 2020
- English School - Topway English School.

EXPERIENCE

- Contel Telecom: Software Developer (mai 2018 – ago 2019)

At Contel Telecom I started as an intern and became a programmer, my task are doing new features for the web system of the company using asp.net and Javascript.

- Imply Tecnologia: Fullstack Developer (nov 2019 - now)

Is the company that I actually work as a software Developer, my responsibilities was build new features on the cashless product of the company, using php for the backend, javascript

and vuejs for the frontend. I have contributed for tasks like a system to create refund documents automatically, and the rebuild of the front end using vuejs.

- Personal Project: Flutter Entrepreneur (dez 2018 – ago 2019)

I had developed a mobile app using Flutter for an attempt to create a startup, the idea was for you to pay for the days you were at the gym and you could attend a different gym each day, and we would pay for the gym based on how many people were there.

- Freelancer Project: Flutter Developer (oct 2019)

It was a small Project that I had done last year, was a mobile app developed in Flutter that allows the users make recharges using their credit card on the app.
